

# This is how you clean the Sounding Toys sound

1

Always clean the sounds before and after using them. To Wash the sounds, you can use dishwashing detergent or other neutral soap to remove any grease. Shout carefully.

2

To Sterilize the sounds in boiling water. Bring the water to boil, let the sounds remain in the water for 1-2 minutes. Be careful not to burn yourself with hot water.

3

Remove the sounds from the water and let them to cool before using. Use only clean surfaces before using. It is safe to wear nitrile protective gloves during a sounding session.

4

Be sure to clean the sounds after use by washing and cooking. This will avoid any bacteria and keep the sounds in good condition during their storage.
